

Franklin Open

Franklin Open is focused on content from the **engineering** and **applied mathematics** fields.

NEW
open access
journal

Topics:

- Neural Networks & Learning Systems, & Speech
- Complex Networks & Cyber-Physical Systems • Energy & Power Systems
- Control Engineering & Robotics • Information & Communications
- Data Science & Artificial Intelligence • Images, & Signal Processing.

3 facts about Franklin Open:

- As an open access journal, *Franklin Open* has a greater openness to new topics. All submitted manuscripts will undergo a rapid but rigorous peer review and, after acceptance, all published articles will be immediately and permanently free for everyone to read and download.
- Editor-in-Chief, [James Lam](#) and the [Editorial Board](#) who will handle the papers in their areas of expertise, through the peer-review process, are well-recognized professionals who will ensure papers are evaluated in a clear and timely manner.
- **Publish for free until 31 May 2023:** The Article Publishing Charge (APC) fee of USD1900 has been completely waived for articles received and accepted before 31 May 2023. [Find out more.](#)

Papers already published:

- [Automated and precise heartbeat detection in ballistocardiography signals using bidirectional LSTM](#)
Shiyu Zhang, Haihong Zhang, Zhiping Lin, Soon Huat Ng
- [Adaptive neural sensor and actuator fault-tolerant control for discrete-time unknown nonlinear systems](#)
Alma Y. Alanis
- [Comparative study of state and unknown input estimation for continuous-discrete stochastic systems](#)
Peng Lu
- [Event-triggered integral sliding mode formation control for multiple quadrotor UAVs with unknown disturbances](#)
Zhiwei Hou, Peng Lu

2021 Impact Factor[®]
